Description

Code: **564+977**
Typology: **Fixed**
Collection: **HPL Indoor /
Outdoor Tops**

Static Load: 100 Kg
Shape: Square

Technical Info

Width: **69 cm**
Depth: **69 cm**
Height: **73 cm**
Weight: **15.6 Kg**
Static Load: **100 Kg**

Packaging

Packages: **2**
Pieces for pack: **1**
Dimensions: **76x76x6cm -
63x13x74cm**
Volume: **0.094 mc**
Polyethylene bag and cardboard
box

Materials

HPL

Suitable material both for indoor and outdoor use. It consists of layers of kraft paper impregnated with phenolic resins and of a decorative surface layer impregnated with thermosetting resins. These layers are pressed at 9 Mp and at a temperature of 150 degrees centigrade.

Maintenance:

HPL laminate is easy to clean and does not require special maintenance. Most stains can be washed with just clean water and dried with soft and clean cloths. For stubborn stains, use a sponge and a specific detergent for laminates or detergents for glass surfaces. Remove all traces of detergents using a dry cloth to prevent streaks or dulling. We recommend trying all products in hidden corner. Avoid using steel wool pads, products containing abrasive creams, powder detergents and acetone.

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosio process.

Maintenance:

HPL laminate is easy to clean and does not require special maintenance. Most stains can be washed with just clean water and dried with soft and clean cloths. For stubborn stains, use a sponge and a specific detergent for laminates or detergents for glass surfaces. Remove all traces of detergents using a dry cloth to prevent streaks or dulling. We recommend trying all products in hidden corner. Avoid using steel wool pads, products containing abrasive creams, powder detergents and acetone.

To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.
