Thor is a collection of steel chairs whose style evokes that of the peasant tradition. Its color palette and its unusual shape of components' assembly make its classic lines more modern and lively. The Thor offer also includes a 100% FSC teak version of the chair and stool seats, which can also be easily later applied to the steel seats. The result is an interesting combination of materials, obtained thanks to an in-depth study of the material mix.

Description

Code: **657+659**
Typology: **Barstools**
Collection: **Thor**

Stackable: 4
Static Load: 200 Kg
Test: EN581-1 / EN581-2
Seat Height: 76.5 cm

Technical Info

Width: **48 cm**
Depth: **48 cm**
Height: **76.5 cm**
Weight: **8 Kg**
Static Load: **200 Kg**

Packaging

Packages: **1**
Pieces for pack: **4**
Dimensions: **141x51x51 cm**
Volume: **0.366 mc**

Polyethylene bag and cardboard box

Colors

Marine Blue - Teak

Matt White - Teak

Pink Magnolia - Teak

Sapphire Blue - Teak

Taupe - Teak

Ocean Green - Teak

Military Green - Teak

Black - Teak

Grey/Green - Teak

Intense Red - Teak

Cement - Teak

Antique Iron - Teak

Maple Red - Teak

Indian Brown - Teak

Curry Yellow - Teak

Dark Green - Teak

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

Teak

Traditional wood used for outdoor furniture with an exotic and timeless appeal. Teak is a hard wood with a high oil content suitable for outdoor use, without the need of painting. If it does not receive any protective treatment, the surface will turn into a silvery-grey finish, the natural protection of the internal part of the wood, considered an essential part of teak's charm. The teak used for EMU products is FSC® certified.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

As it is a natural material, it could have different nuances from one product to another or between components of the same product. In case of sudden changes in temperature and humidity, moreover, cracks may also occur. If it does not receive any maintenance treatment with the periodic application of common and specific oil-based protective products, the surface will turn into a silvery-grey finish that can be removed with a light sanding surface and subsequent polishing with an hessian cloth. Small stains caused by oil or other food products must be removed immediately, before the wood absorbs them, by sanding the concerned area and by polishing it with an hessian cloth. Stains from coffee, juices, natural drinks, without food additives, can be promptly removed with water and a soft cloth. When the wood gets wet for the first time, it is normal for the surface to become slightly rough when it dries; the initial polished-effect can be restored with light sanding surface and subsequent polishing with an hessian cloth. Teak is a natural material that absorbs water and is rich in oils. Over time, these oils, by a natural process can rise to the surface and stain the cushions that have been used. Stains on the cushions can be removed using soap and water.
